1901.2

## TO NEW STUDENTS.

---

We, the members of the Young Men's Christian Association of this college, welcome you, the new students, to the Maryland Agricultural College, and ask you to become members of our Association. There are many responsibilities to be borne by the association, and we desire your aid in bearing the same. The world is desirous always of busy men; and our association is seeking the new students who are willing to work and, while working, to be employed as men alone should be. Now we want you to know that our society has been always one which is willing to look after the spiritual welfare of the students. We will help you to steer your ship into the port of safety after you have cut yourselves loose from home, and have begun your collegiate life here. Our committee will see that you are at home as soon as you arrive at college, whether you care to become a member of our society or not. Boys, all you have to do at this college to obtain the respect of professors as well as of classmates is to be obedient to officers, respectful to instructors, zealous as to the welfare and reputation of the college, and industrious in your work.

This little hand book has been compiled to inform you of a few things which will be helpful to all new students; and we hope you will spend as pleasant a year at the college as we spent last year.

YOUNG MEN'S CHRISTIAN ASSOCIATION.

C. N. BOUC, '03,  
*President.*

## TO THE MEMBERS OF THE YOUNG MEN'S CHRISTIAN ASSOCIATION.

---

I have noted your development as an organization with profound satisfaction. As a force in the collegiate autonomy, the "Young Men's Christian Association" is a factor of characterizing power. In fact, in all the world, Christian manhood and womanhood are recognized as the conserving forces of those vitalizing principles which mark all that is enduring in human affairs. It is conceded that "human happiness has no perfect security but *Freedom*, and freedom none but *Virtue*; virtue none but *Knowledge*; and neither *Freedom*, nor *Virtue*, nor *Knowledge* has any vigor or immortal hope except in the principles of the Christian faith and the sanction of Christian religion."

With this conviction, you may rest calmly in the perfect assurance that the institution of which you are members, will do all in its power to support you in the noble cause in which you are engaged. May your example animate each incoming class with a desire to extend the work which you have so auspiciously begun.

With fraternal greeting, Sincerely yours,

R. W. SILVESTER,  
*President M. A. C.*

## ORIGIN AND DEVELOPMENT OF THE Y. M. C. A.

---

Moral training and Christian fellowship go more toward forming a man at college than any other pursuit he might find.

Inspired by this feeling, several students assembled in prayer meetings, which soon developed into a definite organization, known as the Young Men's Christian Association of the Maryland Agricultural College. After obtaining a copy of the Constitution of the Y. M. C. A., of Washington, D. C., and adopting the same, officers were elected December 19, 1900, to serve until time mentioned in Constitution for election of the same.

The organization was then firmly established, with about twenty-five charter members, with the object, as defined by its Constitution, of carrying on earnest Christian work and worship, especially by and for students, to train them for Christian service, and to lead them to devote their lives to Jesus Christ, not only in distinctively religious calling, but also in secular pursuits. It is in no sense sectarian, nor does it require church membership as a qualification to join. Every member of the college interested in Christian work and worship is eligible for membership, and becomes a member by signing the Constitution.

With this aim our Association grew, holding weekly meetings and Bible classes.

We were recognized by the Tri-State Association and invited to send delegates to their convention, held March 8, 9, 10, 1901, at Wilmington, Del. This invitation was gladly accepted by the Association, it deriving many new ideas therefrom, especially in that part devoted to colleges. The Association gave ten dollars for Tri-State work.

The remainder of that year our Association was

favored with many influential men to lead our Sunday services.

With the beginning of our scholastic year, September 25, 1901, the Association commenced work among the students, especially the new ones, who are very thankful to know that they have friends who will help them by all possible means to get accustomed to the place and surroundings and to make them feel at home.

The Trustees of the College gave the Association an amount of money to furnish a room, and a requisition was made for the same upon the President of the College. We are greatly indebted to Capt. Silvester for his prompt co-operation in this matter.

It is needless to say that our room has afforded much pleasure, as numerous games were secured to amuse the members during the long winter evenings.

As last year, the Association sent a delegate to the Tri-State Convention, which was held February 21, 22, and 23, 1902, at Wheeling, W. Va. It is needless to say in this connection that our delegate brought back to the Association many helpful ideas. The Association gave the Tri-State workers the sum of ten dollars, as in the year before.

It is gratifying to say that there has been a wonderful increase in the number of members this year, the same amounting to about seventy-five, which is nearly double the number in the Association last year.

At a business meeting at which it was decided to publish this hand book, it was suggested that the Association make an effort to give an entertainment to increase the amount of money in the treasury, collected dues from the members from January to June.

This suggestion met with great approval, and the members subsequently gave an entertainment which was a grand success both socially and financially.

The prayer meetings and Bible class have been held regularly this year, and have been well attended. This has been a source of great help to many of the students. We have also been able to obtain fine speakers, which feature has added much enthusiasm to the work.

With this beginning we confidently look forward, believing that our unwritten history as an organization, will under the blessing of God, be a brilliant record of earnest work for the advancement of Christ's Kingdom among men.

## **CALENDAR OF RELIGIOUS SERVICES.**

---

Chapel Services daily at 7.25 A. M.

Religious Services are held in the chapel every Sunday at 3.30 P. M. Addresses are given by prominent clergymen and lecturers.

Regular Y. M. C. A. prayer meeting Sundays at 7.35 P. M.

Bible Class meets every Wednesday at 6.30 P. M.

## OFFICERS AND FACULTY OF INSTRUCTION OF THE COLLEGE.

---

R. W. SILVESTER,

President and Professor of Mathematics.

Thomas H. Spence, A. M., Vice-Pres. and Prof. of Languages.

Maj. J. C. Scantling, U. S. A. Retired, Commandant of Cadets.

W. T. L. Taliaferro, A. B., Prof. of Agriculture.

Harry Gwinner, M. M. E., Prof. of Mechanical Engineering.

H. B. McDonnell, M. D., B. S., Prof. of Chemistry.

Henry Lanahan, A. B., Prof. of Physics and Civil Engineering.

James S. Robinson, Prof. of Horticulture.

A. L. Quaintance, M. S., Prof. of Entomology.

J. B. S. Norton, M. S., Prof. of Pathology and Botany.

F. B. Bomberger, A. M., Prof. of English and Civics.

Samuel S. Buckley, M. S., D. V. S., Prof. of Veterinary Science.

Henry T. Harrison, Principal of Preparatory Department.

Chas. S. Richardson, Director of Physical Culture and Instructor in Public Speaking.

J. H. Mitchell, M. E., J. C. Blandford, M. E., Assistants in Mechanical Engineering.

E. P. Sansten, M. S., Associate Horticulturist.

F. H. Blodgett, M. S., assistant in Pathology and Botany.

R. I. Smith, B. S., assistant in Entomology.

M. N. Straughn, B. S., Wm. H. Weigand, Assistant Chemists.

**J. B. Robb, B. S., T. R. Gough, B. S., C. G. Church, B. S., Assistants in Chemistry (State Work.)**

**Jos. R. Owens, M. D., Registrar and Treasurer.**

**W. O. Eversfield, M. D., Physician in Charge.**

**Miss M. L. Spence, Stenographer and Type-writer.**

## THE COLLEGE BUILDINGS AND GROUNDS.

---

In Prince Georges' County, Maryland, thirty-two miles from Baltimore and eight miles from Washington, D. C., on the B. & O. R. R., is located a station known as "College."

Leaving one of the dozen or more daily trains which stop at College Station, one walks a quarter of a mile through the pretty little town whose post-office is known as "College Park," to the point where the City and Suburban Electric Railway brings its passengers from Washington and intermediate points. Another quarter of a mile west on College Avenue, brings one to the Baltimore and Washington Turnpike, with the attractive suburban town of Hyattsville two and a half miles to the south, and the buildings of the Agricultural Experiment Station adjoining the grounds of the college to the north. Crossing the turnpike one enters the college grounds and for another quarter of a mile ascends the commanding hill upon the summit of which, half hidden by oaks and elms, stands the group of college buildings. On the right of the road which winds among a grove of trees, is the extensive campus which forms the drill ground and athletic field of the students.

At the western end of the campus, at generous distances, are situated the Barracks, the Morrill Science Hall, the Gymnasium and Library, the Chemistry Building and the building of the Mechanical Engineering Department. The home of the President is about a quarter of a mile to the north of this group of buildings, and the new hospital is to the west. The model barn is further to the west, while the college farm of about three hundred acres and the green house lie to the south.

All of the five buildings facing the campus are of brick and are heated by steam and lighted with

gas furnished from a central plant on the college grounds.

The barracks, a large, five-story building contains the mess hall and chapel in the basement, the offices and lecture rooms on the first floor and the student's quarters on the three upper floors. Bath rooms with modern sanitary arrangements are provided by an addition erected to the main building. Fire escapes are also attached to this building.

North of the barracks is the new Morrill Science Hall containing various lecture rooms and well equipped laboratories of the Departments of Agriculture, Physics, Horticulture, Veterinary Science and Vertebrate Zoology, Entomology and Invertebrate Zoology, Botany and Plant Pathology.

Still further north is the Gymnasium and Library building. The gymnasium is furnished with modern athletic appliances. The well lighted reading room and library is on the second floor.

East of this building is the Chemical Building, containing the lecture rooms and the thoroughly equipped laboratories for practical work.

The lower floor of this building is for the greater part occupied by analytical work under the direction of the Professor of Chemistry, who is also the State Chemist.

Still east of the Chemical Building is the Mechanical Engineering building, containing workshops for carpentry and forging, machinery rooms, a drawing-room, library and office. The heating plant of the college is also in an annex to this building.

The new hospital, has just been completed. The possibility of any form of contagious disease spreading among the students will thus be reduced to the minimum.

The general appearance of the college grounds as a whole is very attractive. This is especially true in the spring and summer when the lawns are well kept and the terraces tastefully decorated with ornamental plants and flowers. It would indeed be difficult to find a view from any college to surpass that from the grove looking east over the campus of the Maryland Agricultural College.

---

## CHURCHES.

---

Episcopal Church, College Park, Md. Sunday School, Sunday, 10 A. M. Morning prayers, 11 A. M.

Holy communion on the first Sunday in the month, at 9 A. M.

Pastor.—Rev. Percy St Michael Podmore, M. A.

Presbyterian Church, Berwyn, Md. Sunday School, Sunday, 10.30 A. M.

Pastor.—Mr. F. L. Middleton, assistant pastor, Mr. J. W. Matson.

These two churches are within walking distance of the college.

There are at Hyattsville, Md., the Episcopal, the Baptist, the Presbyterian, the Catholic, and the Methodist Churches. All the different denominations have services at their respective churches on Sunday mornings.

On Sundays, Cadets desiring to attend church at College Park, Berwyn, or at Hyattsville, from 8:30 A. M. to 2 P. M., may do so by registering their names with the Officer of the Day, and reporting to that officer on returning.

## **MILITARY DEPARTMENT.**

---

The Military Department is a distinctive feature of the college. By special Acts of Congress, provision is made for the maintenance of Department of Military Science in each of the land-grant colleges. An officer of the United States Army is detailed to act as instructor and as Commandant of cadets.

The Military Department of this College is in a most flourishing condition. All students upon entering, unless physically incapacitated, are enrolled in one of the three companies of the cadet battalion. Students are required to wear the prescribed uniform at all times when on duty. The discipline in barracks is intrusted to cadet officers, under the supervision of the Commandant, and the discipline of the College is generally military in its nature. Promotion in this Department is made according to merit and record in military matters.

The practical instruction of the cadets consists of daily infantry drill, outpost duty and artillery drill. The study of tactics and lectures on military science constitute the class-room work of the department.

The Military Department is a decided factor in the moral and physical development of the student body. By encouraging habits of promptness, obedience and neatness, and by its beneficial effects upon the carriage and general health of the students, it adds materially to the usefulness of the college as an educational institution in the true sense of the word.

## ATHLETICS.

---

It is an old and true saying that no mind can be properly developed unless the body is developed along with it. The interest taken in athletics by the students of the college shows that they fully realize the importance of this. Two hours each day are set apart for the purpose of allowing the students to engage in athletics, and every one is expected to devote these hours of recreation to the development of his body.

For the purpose of promoting this branch of the college course, an athletic association has been established at the college composed of and under the control of the students. All athletic teams are organized and kept up and all contests held under the auspices of this association. The branches which have received special attention here are baseball, football, track and tennis.

Of these baseball seems to be the favorite among the boys and has taken the lead. Each year, beginning with the spring of '98, this college has been represented by a base ball team the peer of any college team of the State.

Foot ball too received a great deal of attention and a good team is expected next fall. All it needs is the ardent support of the students generally and hard work on the part of the applicant for the team.

Our track athletics have only lately come into prominence. Since the spring of 1900, medals have been given to the winner in each event. This has excited a great deal of interest as is shown by the large number of contestants and the fine records made every year.

Tennis is not an unimportant branch of athletics. It too has lately come into prominence. Last year there were eighteen who actually entered the final

contest for the medal and each one of them was a good player.

The base ball and foot ball games take place on the campus, a short distance in front of the barracks. Both are largely attended by visitors from Hyattsville and vicinity.

The track is about a half mile from the college and the tennis courts about one hundred yards. Both are in fine condition.

The gymnasium, situated between the chemical laboratory and Morrill Hall, is equipped with all the latest appliances. Under the instruction of athletic director, Prof. Charles S. Richardson, the Freshman and Preparatory classes are required to take exercise daily. Any others may receive instruction from him along the line.

The fees of the Athletic Association are fifty cents initiation fee and twenty-five cents monthly. The payment of this entitles any student to membership in the Association, training in the gymnasium under Prof. Richardson, admission to the athletic games and the use of suits and all other appliances to those on the teams.

The executive committee of the Association is composed of two members of the faculty and three students, one of whom must be the President of the Association.

In athletics, at all times, do your best, put your whole energy into the work at hand and you will be able to find out your true ability, and participate in at least one form of athletics.

If you are on the team, or trying for a position, always be on the field promptly at the appointed hour, obey the instruction of your captain, and play with the determined spirit never to give up.

## LITERARY SOCIETIES.

---

### Officers of the "New Mercer" Literary Society.

R. L. Mitchell, President; H. N. Lansdale, Vice President; L. E. Mackall, Secretary-Treasurer; J. McL. Turner, Sergeant-At-Arms; Calvin Page, Editor.

---

### Officers of the Morrill Literary Society.

T. B. Symons, President; S. P. Darby, Vice President; A. R. Hirst, Secretary-Treasurer; E. B. Walls, Sergeant-At-Arms; J. I. Wisner, Editor.

The literary societies have for many years been considered as a great aid to the college work. Their usefulness was first recognized early in the history of the college. Through them a good knowledge of parliamentary law is gained as well as a readiness of expression and activity of thought,—qualities particularly valuable to the American citizen.

The first society mentioned was first organized through the efforts put forth by Dr. William W. Mercer, in 1861. The society flourished for some years, but, unfortunately, with the death of its founder it began to decline, and in 1899 ceased to exist. For several years the college was without any literary organization, but in 1892 its necessity was strongly felt, and the literary minds of the college caused another effort to spring up, and through the energy of some of its workers it was again organized, with Mr. F. B. Bomberger as its president; thus the society flourished for two years with many laudable entertainments.

In 1896, the literary work of the college was carried on by an organization modeled after the English House of Commons. The following year it rep-

resented our own form of government. This did not last long, however, and in the fall of 1896, the Senior Class organized the New Mercer Literary Society, which still exists.

The Morrill Literary Society was first organized in 1894, through the efforts of Professor R. H. Alvey. It was named in honor of Senator Morrill, who did so much to aid the land-grant Agricultural College in the United States. It flourished for one year, when it was absorbed by other literary organizations of the college.

In the fall of the year 1899, it was reorganized through the efforts of Mr. H. J. Kefauver, President of the New Mercer, with Mr. W. Wiegand as its first president. From that time there have been two literary organizations in the college.

The time for meeting of the societies is Friday night of each week, the usual program consisting of readings, recitations, debates, extempore speaking, etc. Occasionally the two societies meet jointly for the purpose of debating some important question, one society taking the affirmative side and the other the negative.

Each year two members are chosen from either of the two societies, to compete in the Oratorical Contest of Maryland Colleges, one acting as principal and the other as alternate.

During the present year the work of both societies has been very creditable both to themselves and to the college at large, and we hope that interest along this line will continue to grow, so that in course of time this branch of the college work will be placed in its true position as among the most important in the college curriculum.

## THE COLLEGE LIBRARY.

---

The college library may properly be regarded as one of the departments of the institution, as it aids for purposes of reference and has a direct influence upon the mental development of the students.

The present quarters of the library, while adequate for its immediate needs, will necessarily be too limited in the course of time. The reading room is well arranged and lighted, and in all respects comfortable and convenient.

While the library is not large the collection of works has been carefully chosen, and the shelves contain a fair supply of works of reference, history, biography, essays, poetry and the standard works of fiction. Several hundred volumes of bound government reports form an important addition to the reference works of the library. Many of the leading magazines and a large number of newspapers are subscribed for.

## **EDITORIAL BOARD OF THE REVEILLE.**

---

### **For Class 1902.**

A. R. Hirst, Editor in Chief.

J. D. Bowman, R. L. Mitchell, Associate Editors.

### **Department Editors.**

Athletics, L. E. Mackall.

Humerous, S. P. Darby.

Literary, Jos. Condon, Jr.

Rosshbourg Club, T. B. Symons,

### **Board of Managers.**

H. N. Lansdale, Business Manager.

J. I. Wisner, W. S. Fendall, Assistants.

---

## **BIBLE CLASS.**

---

Realizing the great necessity for a Bible Class in connection with our Young Men's Christian Association, one was organized February 4, 1902. The meetings of the class are informal and the boys present are at liberty to ask any questions on the lesson or any part of the Bible, excepting those questions which may involve the belief of some special denomination.

We hold our meetings every Wednesday evening at 6.30 p. m., and care is taken that they do not last any longer than 30 minutes. One of the students has charge of the class.

This year, after dwelling for a while upon the new testament, we started in the first book of the Old Testament. The work since March last has been the characters of the "Book of Genesis," which will be finished by the last part of May, 1902.

## MISCELLANEOUS.

---

Candidates for admission will be examined September 16 and 17.

Fall term begins Thursday, September 18, 1902.

### Mails.

The mail is carried from College Park three times a day, and delivered to the cadets, in their quarters, by the O. D. The times of delivery are: 8.30 a. m., 2.30 p. m. and 7.30 p. m.

The mail is carried from college to the post-office three times a day. The times of collection are 7.00 a. m., 12.00 m. and 4.30 p. m. Mail all letters in the box that can be found on the President's Hall. Have all mail addressed care of M. A. C., College Park, Maryland. Cadets are notified of all registered letters, money orders, etc., that are held for them at the postoffice, while special delivery letters are delivered to them immediately on their arrival.

### Railroads.

The college can be reached by the Balt. and Ohio R. R. The closest station to the college is College Station, and all tickets should be bought direct to this station. There are about twelve trains each way a day that stop at College, and if you are on an express, you can get off at Hyattsville and return on the electric cars. This is not the best thing to do, as a new student may get confused in finding his way to College.

The City and Suburban Electric Road of Washington runs close to College. This line of cars starts on G. street at the Treasury, and goes to Berwyn via Hyattsville and College. You can go to any part of Washington by getting transfers from this line of cars.

## **Telegraph.**

Telegrams to students should be sent via Hyattsville. This is our telegraph station, and all telegrams are immediately telephoned to College and then delivered to the addressed. The Western Union Telegraph Company has an office at Hyattsville and the Postal Telegraph Company is contemplating establishing one there.

## **Telephone.**

There is a long distance Chesapeake and Potomac Telephone in the college.

## **Hotels.**

There are no hotels in College Park, but you can secure accommodations in Hyattsville at reasonable rates.

## **Money Deposits.**

All cadets should upon arriving at College, deposit their money with the treasurer. The college cannot be held responsible for losses due to negligence on the part of the cadet, nor will the President be responsible for money lost in rooms. It is the best plan to deposit money with the treasurer and draw on him when you desire.

## **Self-Support.**

A limited amount of money can be earned by students by taking advantage of the opportunities arising from time to time to do clerical work, tutoring, and such other labor as may not interfere with regular scholastic duties. Those in need of help to continue their work and whose course is marked by an earnest desire to succeed are always given the preference.

---

## Maryland's School of Technology.

---

### Four Courses of Instruction.

#### AGRICULTURAL, MECHANICAL, SCIENTIFIC, CLASSICAL

---

Fall Term commences Monday, September 24th. Candidates for admission will be examined on September 18, 19 and 20.

Each department supplied with the most modern and approved apparatus. Practical work emphasized in all departments. Graduates qualified to enter upon their life's work at once.

Those of the year 1902 all secured positions or else are taking special courses for professional work.

Practical Laboratories for the Departments of Chemistry, Entomology, Pathology, Agriculture, Horticulture, Biology, Physics and Engineering.

This is the day for knowing *HOW TO DO* some one thing well. The boy so equipped is ready for the battle of life.

### DAILY SANITARY INSPECTION BY PHYSICIAN TO COLLEGE.

Boarding department supplied with all the modern improvements. New bath rooms and closets in an annex to the main building. Steam heat and gas, books, room, heat, light, washing, board, medical attention.

---

### \$154.00 FOR THE SCHOLASTIC YEAR

\$5.00 caution money on entrance. \$6.00 for material for each laboratory. Payments made quarterly. Catalogue, giving full particulars, sent on application.

# SHORT WINTER COURSE IN AGRICULTURE.

Commencing January 16th, 1902.

A ten weeks' course designed for those who are unable to take one of the longer courses and including the largest amount of purely practical information about farming in all its phases. This course is invaluable to the young man desiring that information on Agricultural topics so necessary to meet the sharp competition of the present day. The College Authorities have removed the nominal charge of \$5.00. We are anxious to have the young men of Maryland, who intend to remain on the farm, embrace this opportunity. Many cannot afford a four years' course. This solves the problem for them.

## Synopsis of the Course.

Farm Crops and Cultivation of the Soil, 8 lectures; Drainage, 5 lectures; Breeds of Stock and Principles of Breeding, 10 lectures; Stock Feeding, 8 lectures; Manures, 5 lectures; Tobacco, 6 lectures; Dairy Husbandry and Dairy Chemistry, 10 lectures; Horticulture, 15 lectures; Agricultural Chemistry, 5 lectures; Plant Physiology, 5 lectures; Sanitary Science, 5 lectures; Economic Entomology, 5 lectures; Farm Accounts, 6 lectures; Farm Buildings and Bridge Construction, 8 lectures; Carpentry and Blacksmithing, 10 exercises; Veterinary Science, 15 lectures; Citizenship, 10 lectures.

## No Expense for Tuition, Use of Laboratories or Supplies.

Good board at moderate rates can be secured in the neighboring villages of Berwyn, Lakeland, Riverdale and Hyattsville. All within short distance of College and Experiment Station.

Board, Room, Books, Heat, Light and Laundry furnished for a limited number at College for \$4.00 per week.

Electric Cars make frequent connections; only a pleasant walk in good weather.
